

There is a Place for You in Thunder Bay!

We are currently recruiting for
1 Full-Time, Nuclear Medicine Physician

TBRHSC is a state of the art, 395 funded bed acute care facility. Our hospital provides coverage to a regional population base of 250,000 people and delivers all services, which will include Cardiac Surgery by 2025. TBRHSC is the Regional Trauma Centre and Cancer Referral Centre for Northwestern Ontario. The hospital provides a full-service Nuclear Medicine program. Applicants should be comfortable with general and cardiac nuclear medicine studies, cardiac stress testing, bone densitometry, PET and radioisotope therapy. Experience with IQ-SPECT cardiac interpretation or brain SPECT would be an asset.

The Nuclear Medicine department currently consists of 2 state-of-the-art Siemens Intevo 16 SPECT/CT cameras with IQ-SPECT and xSPECT capabilities, 1 dual-headed GE MG gamma camera, 1 single-headed GE MPR gamma camera and a GE Lunar Prodigy bone densitometer. Our current Philips Gemini 64-slice PET/CT is being replaced with a new Siemens Biograph Vision next March. TBRHSC uses Hermes software for image analysis and interpretation.

The preferred candidate will have or be eligible for licensing with the College of Physicians and Surgeons of Ontario and will qualify for certification with the Royal College of Physicians and Surgeons of Canada. Specialty certification in Diagnostic Radiology is not required. Dual trained candidates will be considered on a case-by-case basis but should be aware that this is a Nuclear Medicine position and must be comfortable providing the full range of Nuclear Medicine services.
